

Submitter: Spencer Lennard
On Behalf Of: KS Connectivity
Committee: House Committee On Climate, Energy, and
Environment
Measure, Appointment or Topic: HB3932

As an Oregon resident and a wildlife ecologist I implore to support HB 3932.

With Oregon watersheds in a generally dismal ecological condition, it is obvious that simply allowing beavers (a native species) to roam and occupy will be a tremendously beneficial and free form of watershed recovery.

We need to suspend the outdated legacy of killing such species, at the extreme detriment of our creeks, and rivers.

Sincerely,

Spencer Lennard
