

Submitter: Christine Linder

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SJR28

We moved to Oregon for access to the outdoors, for its clean and healthy environment. While moss still grows on our trees, the future of our environment is in jeopardy. We worry about our children and grandchildren. We all absolutely have a basic right to clean air for all life, clean water for drinking, and clean and nutrient rich soils for growing our food. We live in harmony with our environment—slugs, steelhead, and osprey alike—and need to preserve this for everyone. Thank you for supporting this amendment.
