

Submitter: Joe Walicki

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

I have worked in central Oregon on a number of streams needing more vegetation and beavers, planting trees and making small dams. This bill is important to give beavers a chance to protect and improve our streams all around Oregon, for our children and grandchildren. Please pass this bill. Thank you.
