

Submitter: Laura Vesh

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3932

I support HB 3932. This is a common sense bill and will protect beavers in the "impaired" habitats that need them most. Beavers improve stream and river health and promote fire resistance. I support legislation that improves water quality and environmental health and urge you to vote yes.
