

Submitter: Theodore Chu

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Beaver are our environmental engineers out there doing good for watersheds 24-7-365. They provide habitat for many of the wildlife species we all like and benefit from. They raise water tables and store water in our more arid areas of the state. Their pelts are not nearly worth what they are alive. There is especially no reason to be trapping beaver on public land.
