Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SJR28

I support Senate Joint Resolution 28, the People's Right to a Healthy Environment. I learned recently that data from FirstStreet.org indicates that my own home's air risk is increasing as weather patterns change. First Street placed my home in Portland under extreme risk over time, ranked 10th on a 10 point scale of poor air quality (AQI in excess of 100). We can do better than this! A healthier environment will involve costs but such costs will be more than offset by savings in healthcare costs and reduced damage from floods and wildfires. Please pass SJR to the floor for legislator consideration.
