

Submitter: Zachary Davis
On Behalf Of: Trappers and soortsman
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3932

This is a rediculous bill. As someone who takes beavers in the state of Oregon I can clearly state that there is an over abundance. There is a very healthy population. This would hurt many land owners that have chronic problems with them. They are a valuable renewable resource. This would also hurt many individuals who make there living in harvesting this valuable animal. The only reason we have a healthy population is because of trappers. It is a very bad thing to let wildlife management go into the legislated , leave it to Oregon Department of wildlife and wildlife officials to make the laws.
