

Submitter: Timothy Buckendahl
On Behalf Of: Oregon Trappers association
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3932

I appose this bill as it will have negative consequences in many ways including destruction on creeks and rivers by overpopulated beaver and create undo hardships on legal Trappers that do in fact earn an income from the valuable renewable resource called fur. Also if it is still ok for the state to trap them which costs taxpayers extra money at a time they shouldn't have to give more, licensed Trappers are able to take care of problems at little to no cost to the public

Thank you
Tim Buckendahl
