

Submitter:	Bryce Jackson
On Behalf Of:	Oregon Trappers Association
Committee:	House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic:	HB3932

To whom it concerns, please do not support or pass this bill. Preventing the harvesting of beavers will be detrimental to waterways and management in Oregon. Beavers are wonderful engineers, but they need managed. They can and will dam waterways causing flooding of lands and possible destruction of properties. They can and will destroy the vegetation along waterways and make banks unstable. Proper management by trapping and or shooting of Beavers is a necessary requirement for proper management. Please do not support or pass this bill. It is detrimental to managment of waterways.

Thank you for your time.

Bryce Jackson, lifetime member of the Oregon Trappers Association and Idaho Trappers Association.
