

Submitter:	Travis Chilson
On Behalf Of:	Oregon trappers
Committee:	House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic:	HB3932

Hello i am a wildlife damage management specialist. I have been working with wildlife over 15 years. This legislation should be opposed based on major issues concerneing wildlife biology and the impacts it wOuld have on state management of wildlife. ODFW should be solely responsible for dealing with wildlife management issues in Oregan.

This would be a huge step backwards from science based wildlife management and following the North american model of wildlife conservation and the public trust doctrine.

Please kill this bill.
