

Submitter: Richard Harden
On Behalf Of: Myself and the people of the state
Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water
Measure, Appointment or Topic: HB3800

The people of this state have been taking care of the quality and conservation of water in this state for as long as I can remember. And doing quite a good job of it I would add. The people in a large area of this state are already dissatisfied with the attack on them by government trying to micromanage every aspect of their lives. If these attacks of their water rights continue it will confirm their fears and justify their dissatisfaction with their representation. If these legislative house and senate bills are passed the damages they will cause to the state economy, property values, and revenue intake for the state will be devastating. At that point hard telling the effects and outcomes. Please for the sake of this state and the people within it ,leave water alone. Vote no on these bills and show the people you really do understand them and their families and the struggles that they endure. Water is life, don't try to take it away. You may not like the results of your actions. And the people will hold you accountable. Submitted with all involved in mind. Thank you.
