

Submitter: Sue Adams

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

I support HB 3932 which would close beaver hunting and trapping on public lands that need water quality improvement and restoration of habitat.

Beavers are tops in being ecosystem engineers and they have activities that come naturally to restore Oregon's 100,000 miles of waterways that have poor quality.

Thank you.
