

Submitter: Julie Hackett

On Behalf Of:

Committee: Senate Committee On Human Services

Measure, Appointment or Topic: SB611

As a commercial farmer on a small farm I know that productive vegetable gardens can feed a significant number of community members on very little water. Our communities are stronger with more farmers and fresh produce. Reasonable legislation allowing low-water practices for commercial growing in domestic wells will improve our communities and will not threaten our ground water supply. Support SB 611 to provide everyone with fresh food and access to it.
