

Submitter: Gerald Boyd

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3944

I support this measure as it mitigates some, but not all, of the problems presented by the poorly constructed wildland fire risk map and its related requirements. Unless and until state and federal wildlands are required to manage their overgrown, fire prone properties putting the burden on private property owners is completely unfair. Many of us have created much more than minimal defensible space and under the existing legislation that fact is not considered.
