

Submitter: Terry Leggert

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

It is important to recognize the essential role that Beavers's serve. It has been demonstrated that they rehabilitate rivers and creeks. They provide habitat for other species. Their works helps prevent flooding and counters effects of drought. Farmers who have supported this have seen positive results. We need to help show others that continuing the misguided practices of the past are not helping our environment.
