Measure, Appointment or Topic:	SB698

I oppose this legislation. The 2nd Amendment to the Constitution of the United States is clear when it says that the rights to own and use a firearm "shall not be infringed" and this bill does in fact infringe on those rights. This bill violates our civil rights by denying the right, especially by a person that has passed the requirements for concealed carry, to exercise those rights. It has been proven that crime is reduced when citizens are armed and this bill removes the deterrence of having an armed citizenry.
