On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	SB1153

Under current law, the state can approve water right transfers without considering impacts to streamflows and the fish and water quality they support. This unintended loophole is dangerous and needs to be closed to protect our fish and the health of our water. Please support SB 1153: The bill would require the state to ensure fish and water quality are not harmed when reviewing proposed water right changes. Simple, but important Thank you for your support!
