

Submitter: Skye Decker

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Dear Chair Rep. Lively, Rep. Vice-Chair Gamba, Rep. Vice-Chair Levy and members of the committee,

HB 3932 is imperative for our waterways. Human intervention and destruction only causes more negative impacts AND costs even more money to maintain over the long haul. It makes ZERO sense from a FINANCIAL, ECOLOGICAL, and HUNTING FOR FOOD OR ANIMAL PRODUCT perspective to allow hunting of a species on public lands that can save our waterways for free. Beavers help increase plant biodiversity and healthier waterways which in turn increase fish and wildlife numbers. Beavers support and increase our natural resources better than any human and their wallet can. Let us not argue against logic for what is only more destruction and a squandering of quality of life for all - humans and wildlife. I support HB 3932. Please also support HB 3932.
