

Submitter: Randell Whiting

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

I am writing today in strong opposition to HB3932. ODFW already manages our beaver population with strict seasons and harvest reporting. Beavers are flourishing in Oregon and in many areas, are overabundant. This bill is based on emotions, not science based data. We cannot allow the legislature to manage our wildlife based on how someone "feels". Let ODFW do their job. Beaver trapping is Oregon's history, let it continue. Please vote no on HB3932.

Respectfully yours,
Randell Whiting
