Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

I support HB 3932 because of the transformative power of beavers to create healthier conditions on Oregon's waterways. I've seen firsthand how ecological restoration that encourages beavers to thrive works to improve water quality. It makes complete sense that we would leave beavers in peace to do their important work on Oregon streams where they are needed most. Please support this common sense bill.
