

## **SB 301**

Oregon waters and their upkeep, paid for by taxpayers, should be allowed access for recreational use in boats that are for reasonable use. Ballast is not an unreasonable addition to a boat. It is quite common, can be used with destruction of personal property, and should not exclude someone from public waterways. Over policing of water is not a direction voters want or need. Past bills, rules, and laws seem to benefit everyone but the boaters. Pass SB 301 and don't stop there. Ease restrictions, allow access, and don't bend to a few loud residents on the water.
