

Submitter: Miles Wilcox

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

The boats that exist to only make huge wakes are plainly an environmental and safety hazard. The "sport boats" have only gotten bigger and serve no purpose other than making giant waves on enclosed bodies of water. Where my family goes boating the only way to enjoy the water is early morning before these monster boats get out. After that, the waves just pound the shore and dock nonstop. If people want to surf there is an ocean near by. Please protect the respectful users of Oregon's waterway by opposing this bill. Thank you
