

Submitter: Craig DeRoy

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

I (and my extended family) **STRONGLY OPPOSE** any action or potential legislation that would change the current use and conditions of the Willamette River/Newberg Pool. Our home and my family's primary residence is on the river and we have a dock that is exposed to the wakes generated by ballasted boats. Erosion of river banks is also of concern and would affect boaters and non-boaters alike. The current uses and restrictions on the river serve to minimize damage to the environment and our property and we want to see the current rules and regulations maintained.
