

Submitter: John Drzal

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

To the Committee Members.

SB 301 is a bad look for Senator Meeks. He is trying to undo the minimal protections passed in 2022 by making wake boat even heavier. This will undo the broad general benefit of the existing legislation in favor of a narrow private use. The Newberg Pool is not a playground for one specific interest. I urge the Committee the drop the Meeks amendment and let the studies proceed as intended.

Thank You,
John Drzal
