Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3932

More than 2/3rd of surveyed waterways in Oregon (106,390 miles) are currently classified as "impaired" based on criteria including water temperature, sedimentation, level of dissolved oxygen, etc. Scientific research shows that beaver dam complexes can address most of the water quality issues. Let beavers do their natural job in the Beaver state!
