

Submitter: Nancy Osborne

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I urge passage of HB 3932. This bill would stop beaver hunting on public land waterways. Beaver dams improve water quality by slowing down water flow and providing filtration thru the dams. These animals provide a service by restoring large rivers and small streams and lead to healthier waters for us all. Please pass HB 3932 and let these animals work their magic.
