

Submitter: James Duyck

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

I don't even boat in the river. I'm fortunate to have property near Prineville reservoir where I boat the summer

I have a hard time understanding how any kind of wake surfing boat, ballast and all, can be environmentally more destructive than Mother Nature!!

I've seen docks and houses washed down river when high water hits. Haven't heard to much in the news about boat causes dock to wash down stream

Anyhow vote how you want. I'll watch and vote accordingly with all my voting boating and non voting friends when it comes to reelection
