

Submitter: Rebecca Lexa

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

I am writing to record my opposition to SB 301. The -1 amendment would cause undue damage to areas like the Newberg Pool, and are not taking unique ecological and hydrological characteristics into account. Keep SB 1589's results intact, and do NOT pass SB 301. Thank you.
