

Submitter: James Neu

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I am in support of HB 3932. Beavers are critical to waterways and ecosystems that affect many other species including humans in a positive manner. We should preserve their existence and this bill would do that.

Please support and pass HB 3932.

Thank you for the opportunity to comment and for your consideration.
