

Submitter: Karl Swanson

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

HB3932 is misguided because wildlife management should remain with the trained wildlife experts

at the ODFW Commission. The hubris of legislators.

trying to interject their politics into what should be science based decisions is

something I would expect from the Trump administration, not or Oregon Legislators.

I beg you to not undermine professional wildlife management in Oregon. We should trust our

biologists and trust science.

You must reject HB3932. Decisions about beaver trapping by people like you with no training in wildlife science would be a huge mistake.

I strongly oppose HB3932.
