

Submitter: Rebecca McCroskey

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

I oppose this measure because it weakens the safeguards that protect public safety, wildlife habitat, and equitable access for the broader community. The current system is fair and effective, and the proponents of this measure know that their efforts to undermine current law are in direct opposition to erosion science -- all for the love of speed on our precious waterways. Selfish motives are rampant in America today; I urge you to stem the tide here in Oregon.
