

Submitter: Randy Davis
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3932

Dear members of The Committee on Climate, Energy, and Environment,

I ask that you oppose HB 3932. Wildlife management should be left to those specially charged with and qualified to make scientific judgments, free from politicization, that affect the health of our wildlife populations,—which is exactly ODFW's role. There simply isn't scientific support to justify the action that the bill calls for. Legislating wildlife management often leads to decisions that negatively impact wildlife and state residents like myself who enjoy that wildlife. I ask that you keep beaver management in ODFW's capable hands.

Thank you for your time and consideration.

Sincerely,
Randy Davis
Terrebonne
