

Submitter: David Washousky

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

I strongly oppose HB3932 because it is anti-science, anti-conservation, and completely non-factual. Human beings and animal populations have co-evolved since the dawn of mankind, and to abdicate wildlife management at this point in civilization is lunacy. Science based management by full time wildlife biologists whose job it is to ensure the health and viability of animal populations is responsible, sane, and best for both animals and their ecosystems.
