Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

Wildlife management decisions need to be left to ODFW wildlife commission. The issue of banning beaver trapping on federal and state lands has been presented to the commission three times and rejected due to lack of scientific support. Let the qualified professionals on the the commission manage the wildlife through the beaver management plan. I oppose HB 3932 as the harvest of beavers is already strictly regulated.
