Senate Committee On Rules

Measure, Appointment or Topic:

SJR28

I support amending our constitution to take a stronger stance on our environment. The fact that climate change is greatly impacting our environment is one that can no longer be ignored, and by drawing a line in the sand and making this less ambiguous and negotiable, I believe is the only way to push business and individuals to making the sacrifices needed to ensure a healthy place to live for future generations. Please support this bill.
