

Submitter: Margaret Quentin

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

The facts are clear:

\* The current law works and is supported by science.

\* The Newberg Pool is thriving under SB 1589 with increased safe, equitable use.

\* SB 301 is a step backwards that risks public safety, habitat protection, and fair river access.

I urge Oregon's lawmakers and the public to reject this industry-driven effort to weaken Oregon's river protections. The Newberg Pool is one of the most heavily used and sensitive sections of the Willamette. It is no place for unchecked wake-enhancing boats.

Please do not approve SB 301. Thank you.
