

Submitter: Gary Borjesson

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3932

To whom it may concern,

I live in southern Oregon, where we've been trying to re-establish our state animal, the Beaver, in our backyard, the Cascade Siskiyou National Monument. The research is decisive. It shows that the beaver is good for watersheds, for ranchers, for everyone trying to protect waterways and irrigate land that needs water. Please support this legislation. Thank you.
