Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Citizen scientist and past as a volunteer w ODFW have assisted w amphibian egg mass surveys and turtle surveys. Additionally volunteered w the Salmon Trout Enhancement Program..Beavers and their ponds are vital to the survival of many species including the red-legged frog. They assist to keeping streams cool for Salmonids and maintaining adequate streamflows..they assist w flood control and preventing siltation..they also assist bird diversity by providing invertebrates for their sustenance..

We should not be trapping them on public lands..
