SJR28

I strongly support the "Right to a Healthy Environment" amendment to the Oregon State Constitution. This right needs to be written into our constitution as the health of one's environment can have some of the most significant impacts on a person's well-being. We all deserve to live in a healthy environment. Any claims against this amendment are likely made by those who won't be impacted the most. Please consider what a positive difference this amendment can make in the lives of generations to come.
