

Submitter: Alice Shapiro

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SJR28

I believe strongly that all people have a fundamental right to a clean, safe and healthy environment. When so much of our environment is under threat by the current Federal administration Oregon must take bold steps to protect our state resources. I have been working for environmental justice for all of my adult life and now, as a grandmother, I am concerned for the future of my grandchildren and all species who will inherit what we leave for them.

This is a critical time for Oregon. Our constitution must protect us.
