

Submitter: Sara Hall

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB2583

Students who go to virtual charter schools, private schools, are homeschooled , or any other schooling, should have the same monetary advantages as students who go to public schools. The Student Success Act was made to help students who need it the most, but virtual charter students are not included. HB 2583 is about making sure all students have the same chance to get money from the SIA, no matter where they learn. I'm in favor of this act-- but separate from that, I wish we actually had our tax dollars follow the student.
