

Submitter: Rodney Myrick

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

The river should be open to all users and boaters. The information and research never existed a few years ago when the law kicked families off the river. The vast majority of the river erosion occurs in the winter with no flood control and the blame tries to get put on the boaters unfairly. The truth is people with agendas just want to have their way vs share and compromise. We should simply go back to wake zones.
