

Submitter: Peter Dragovich

On Behalf Of:

Committee: Senate Committee On Natural Resources and  
Wildfire

Measure, Appointment or  
Topic: SB80

Regarding the South Willamette Valley Groundwater Management Area, Oregon State University has said, "Scientific studies have found nitrate to be associated with methemoglobinemia (blue baby syndrome), diabetes, negative reproductive outcomes, and various forms of cancer." Due to the well-documented nitrate concentrations in GWMA's across the state and the failure to take meaningful action to address the sources of dangerous pollution, this measure is necessary to protect the public health, please support SB 80.
