

Submitter: Richard Schulte

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

Morning, I live on the upper Willamette and have had my home here for over 25 years raising my family. We have enjoyed the waterway for many years until a group started proposing unfounded claims about environmental and fish habitat issues. No official studies have been done about boat traffic but rules have been enacted to limit our ability to recreate on this public waterway.

Please support this measure and hopefully eliminate some of these unfounded and over reaching rules that limit everyone's ability to recreate responsibly on our rivers.

Regards

Rick
