Committee: House Committee On Education

Measure, Appointment or Topic: HB2529

At Via Heart Project, we are dedicated to the awareness, education, treatment, and prevention of sudden cardiac arrest through AED placement and maintenance. Through our work, we have witnessed firsthand the life-saving impact of cardiac emergency response plans and automated external defibrillation (AED) programs in schools. To date, AEDs managed by Via Heart Project have been used 211 times, helping to save more than 70 lives, thanks to the quick actions of certified responders and bystanders, alike.
