

Submitter:

Alexandria Gavette

On Behalf Of:

Committee:

Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

I join many of my constituents in their concern that SB 301 will cause more harm to our beloved Willamette river and risk public safety. My dragon boat team has personally witnessed the danger that wake boats cause us (we experienced multiple capsizes last summer due to negligent wake boats) as well as other swimmers and man-powered crafts who enjoy the space, and we fear that loosening regulations on this portion of the river will cause ripple effects downstream. Please keep our rivers and our people safe, and vote NO. Thank you.
