

Submitter: Matt Maghan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

There's very little evidence of negativity of boats to our waterways, however the proven affect of recreation and sport on a persons life outweighs the unproven and totally biased views of those who aren't even affected by the boaters who properly follow the rules and laws of the waterway. Now is the time to stop these claims from those whom aren't even affected by the drastic outcome it will affect to those who love, protect, and cherish the waterways and environment.
