

Submitter: Anne-Marie Eklund

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or Topic: HB3932

I strongly support HB 3932 because it is a common-sense approach to restoring our waterways to healthier, sustainable ecosystems. Beavers are keystone species and ecosystem engineers. If we just let them do the work for us freely, we benefit from cleaner rivers and streams. Scientific research has demonstrated that beavers create healthier river ecosystems. By allowing the beavers to live in our rivers, we are allowing them to restore the degraded systems. Not only does it make ecological sense to pass this bill, it makes economic sense by saving our State money, since the beavers effectively clean up the rivers for us!

Please vote YES on HB 3932
