Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SJR28

Hello, I am an Oregonian. I live in the Rogue Valley. This is primarily a rural area but I do live in a suburban area in Medford. I love my life here. I depend on this environment for clean water, air and food. We all take this for granted. But it is being taken away from me. I strongly feel that the State of Oregon can protect my clean air, water and food only by having this amendment to our constitution. Unfortunately the greed of individuals and corporations has grown so great that those people and entities can foul my water, air and food quite easily. They have done so in the past and are really quite emboldened now to continue and even step up their destruction. Please move this amendment forward to become part of the Oregon constitution so I can stop them (with the help of other Oregonians). Thank you
