For Environmental Science

The Table of Contents reveals the important topics that distinguish Environmental Science from related, but unique subject components, such as Physics, Biochemistry. Meteorology, Climatology, and more.

### 1.1: What is Environmental Science? - Biology LibreTexts

Environmental science is the interdisciplinary study of the interaction of living and non-living parts of the environment, with special focus on the impact of humans on the environment. Learn about the reasons, challenges, and indicators of environmental science, and the tragedy of the commons.

Thus, Oregon State is misrepresenting to students the true nature of Environmental Science.
